**ABSTRACT**

By law, in the past years, students who attend schools for adults have the opportunity to use e-learning platform (max 20% of the school year time).

That means that students can use school materials for learning in any moment of their life, they can improve their knowledge and participate to the final examination in order to reach the school degree.

At the same time, e-learning platform can also be used to make easier the learning of the Italian language for students with a foreign citizenship, who need the final Degree to access to the labor market.

This project has as Coordinator the Ufficio Scolastico della Lombardia (local office of Monza and Brianza): it is a Consortium of 4 high schools where there are classes for Adults in the district of Monza and Brianza.

For the development and for improvement of training for teachers, Consortium's needs are founded on EQAVET indicators:

- To Strengthen teachers' competencies in the use of ICT to create more inclusive and flexible learning settings (Indicator EQAVET 2), for students who have difficulties in learning;
- To improve learning results for students with social and cultural problems, with special needs, through inclusive path with a special regard to the non formal skills (Indicator EQAVET 8), and above all for foreign students.

These are the objects:

- To improve teachers' skills in the use of ICF, in the creation of inclusive learning setting useful for the Final Examination (final Degree)
- To find new tools for the improvement the e-learning platform and on-line learning;
- To emphasise non formal skills in students curriculum, for students who are also workers and for the use of OER in their individual developing plan.

Mobilities in divided in 2 phases and includes 17 people (22 mobilities).

Phase 1: Teachers Training in the use of ICT

Phase 2: Job shadowing with partners with specific skills, experiences and methodologies on ICT teaching, also referring to the Italian language for foreign students.

All the phases of the project will be monitorated and evaluated, and the results will be disseminated through the Ufficio Scolastico of Lombardia.

Sustainability:

- All the teachers of the involved schools will be trained, also the school in the prison;
- A community of practices will be created to support other schools and the Center for Adults (CPIA);
- A new multilateral partnership (KA2 for Adults) will be developed through a shared platform.

With the support of the Scholastic Office at district level (Monza and Brianza) a center of reaserch will be created for the implementation of EQF, ECVET and EQAVET.
